

Student Equity Committee

Date: December 11 , 2008

Time: 1:00-2:00pm

Location: Room 1415-01

Conversation with Larry Buckley (12:30)

- Identify Benchmarks to work from
- Focus - Ken Meehan's support.
 - follow-up: Larry talked with Ken. All requests to Ken will be cc'd to Larry. Ken talked with Chris the next day. He suggested that each project identify questions they would like to have addressed as an evaluative tool and send them to Ken. Ken then will work directly with the program.
- Have your priorities focusing on reasonable goals in regards to budget limitations. Focusing on sustainability is good.
- Many of the decisions will be qualitative in nature. Student satisfaction is key indicator of a successful program.

Conversation with Brad Rippe and Kathie Hodge (1:00)

- Brad inputs information to the website from Co Ho and Andrea Hanstein's direction.
- Kathie stated that the design was from a part-time student designer
- The website is using a standard framework
- There are to be updates in January
- Comments regarding the Website:
 - disjointed regarding a new students route to resources
- Recommend:
 - a Regular Focus Group with student representation.
 - need a different look for the main site.
- Chris will call a focus group meeting to start the conversation.

Conversation with Toni DuBois (1:30)

- Toni asked about cross-over responsibilities. We discussed that this was a working model and our committee's next steps, including our discussion, was to bring everyone together to work on a collaborative implementation strategy.
- She acknowledged that she doesn't see enough community outreach - it was more directed to schools.
- She feels we need key people responsible for implementation, like a "point person".
- She identified the need to have additive activities for new students using a variety of venues.
- More staff development is needed.
